

Call for abstracts, UniDive 3rd general meeting, HUN-REN Hungarian Research Centre for Linguistics, Hungary, Budapest, 29-30. January 2025

UniDive is a COST action, i.e. a scientific network, dedicated to universality, diversity and idiosyncrasy in language technology. It is structured around 4 Working Groups:

- WG1: Corpus annotation
- WG2: Lexicon-corpus interface
- WG3: Multilingual and cross-lingual language technology
- WG4: Quantifying and promoting diversity

The [third general meeting](#) of the action will take place on **January 29-30, 2025.** at the **HUN-REN Hungarian Research Centre for Linguistics** in Budapest, Hungary. We invite UniDive WG members to submit abstract proposals related to the scientific program of the WGs.

Proposals may describe diverse types of contributions, according to 3 different tracks:

- Planned work
- Work in progress
- Complete work, also previously published

A proposal should be **anonymous**, written in English and submitted in **pdf** only. It should include (on the title page) the list of the **relevant WGs**. It should not exceed **2 pages**, including figures and tables (bibliographic references may go beyond the 2-page limit). If **linguistic examples** from languages other than English are included, those should be glossed and translated into English, and an **extra half page** is allowed for this purpose.

[For the sake of uniformity and easing the reviewers' effort, we encourage authors to use the Overleaf Latex template.](#) Other formats (not necessarily Latex-based) can also be used, provided that they conform to the following specifications: A4 paper, Times New Roman 11pt font, 1in margins, 2 columns, see

PDF

.

The **final version** of the accepted abstract should not exceed 2.5 pages, including figures and tables (bibliographic references may go beyond the 2.5 page limit). If linguistic examples from languages other than English are included, those should be glossed and translated into English, and an extra half page is allowed for this purpose. So, the final length should not exceed 3 pages (excluding references).

The reviewing process is double-blind. The selection of proposals will be done by UniDive Program

Committee according to the following criteria:

- relevance to UniDive and the work program of its Working Groups (see pp. 18-20 of the Memorandum of Understanding),
- clarity
- diversity of the languages covered by the workshop program

The selected proposals will be presented at the 3rd UniDive general meeting as posters and/or oral presentations.

At least one author per selected proposal will be reimbursed for their travel and stay.

Important dates

- 26 July 2024: Call for abstracts
- 30 September 2024: Submission deadline
- 21 October 2024: Notification of acceptance
