1st UniDive training school

• Event title: 1st UniDive training school

• Location: Chişinău, Moldova (relocated from Jerusalem, Israel)

• **Date**: 8-12 July 2024

• Location: Technical University of Moldova

• Local Organizers: Victoria Bobicev & Olesea Caftanatov

More photos

Courses and training material

See below for the recordings of the lectures.

• Course 1: Dependency syntax, Surface-Syntactic UD and UD - by Sylvain Kahane

Lecture 1.1 and 3.2:

Basics of treebank querying and annotation

∘ Lecture 1.2:

Dependency syntax, Introduction and History

Lecture 1.3:

Dependency syntax, Syntax Principles

- Exercises
- Course 2: Annotation of multiword expressions for newcomers by Verginica Mititelu and Voula Giouli
 - Lecture 2.1: Definition, characteristics, MWEs in NLP tasks, PARSEME shared tasks and the importance of corpora
 - Lecture 2.2: Decision trees
 - Lecture 2.3:
 - FLAT User's guide and annotation
 - Generic decision tree
 - VMWE Annotation Guidelines v1.3
 - NMWEs-decision tree
 - ModMWEs-decision tree
 - Lecture 2.4: Annotation and issues
- Course 3: Corpus annotation infrastructure by Bruno Guillaume, Daniel Zeman and Agata Savary
 - Lecture 3.1:

Git infrastructure

- Lecture 3.2 and 1.1: Basics of treebank querrying and annotation
- Lecture 3.3:

Corpus format validation

• Lecture 3.4:

Advanced treebank querying and annotation

• Lecture 3.5:

Slides Dan

- Udapi tutorial
- Error mining (slides Bruno)
- Lecture 3.6:

Documentation and discussion on Git

- Students' sessions
 - Students' presentations of challenging syntactic phenomena and MWE examples
 - Brainstormin Hackaton
 - Brainstorming room to submit issues for discussion and vote for them
 - Slides for issue 1: [Chiara] At what point of the creation of a corpus should multiword expressions annotation be implemented? What would be more advisable? Starting right away or annotating them later?
 - Slides for issue 2: [Enriketa] What strategies can be employed to improve the annotation of the verb "to be" and its classification as auxiliary or main verb?
 - Slides for issue 3: [Arianna] How to annotate ungrammatical input such as "I am having some *difficult." (ADJ instead of NOUN and similar)?
 - Slides for issue 4: [Claudia] I would suggest the possibility of introducing dependency relation subtypes for ellipsis. That could facilitate the rapid extraction of ellipsis sites and their contexts in treebanks that do not present an enhanced dependency annotation.
 - Slides for issue 5: [Anila, Adelina, Nelda] Is it feasible to incorporate semantic information—specifically, the meaning of a multiword expression (MWE)—in addition to its tag (e.g., Vid, Nid)?
 - Slides for issue 6: [Abnet] How to choose between two relations (obl and advmod) for derived words that serve as adverbs (almost lexicalized)?

Latest news

The following input is available:

- List of Gitlab and Github account for of the trainees
- A shared document for questions and issues from the trainees

Prerequisites for the courses:

- instructions about how to prepare the **prerequisites** for the courses
- Github repository (it will be gradually updated with the training material)

Sightseeing:

- Folk & Art Souvenirs Shop
- Top tourist attractions of Chișinău

Instructions:

- instructions for personal introductions
- instructions for poster presenters

Call for participating and results:

- List of accepted trainees' projects and posters
- Call for participating in first edition of UniDive Training School Call for applications

Schedule

Monday 8 July	Tuesday 9 July	Wednesday 10 July	Thursday 11 July	Friday 12 July	Saturday 13 July
Registration, poster hanging					
(session 1) Opening session (session 2) Personal introductions	(session 7) Course 1: Dependency syntax (Sylvain Kahane)	(session 11) Course 2: MWE annotation (Verginica Mititelu & Voula Giouli) Annotation	(session 14) Course 3: Corpus annotation infrastructure (Daniel Zeman & Bruno Guillaume) Corpus quality: e-error mining and correcting with Grew-match - fixing errors in text editors	(session 18) Course 3: Corpus annotation infrastructure (Daniel Zeman & Agata Saviary) Documentation and discussion on Git: - Documenting a corpus in README - UD Github issues - PARSEME Gitlab issues	social event
(session 3) Poster session				(session 19) Students' presentations of the work done during the training school (all trainers are present)	
coffee break	coffee break	coffee break	coffee break	coffee break	
(session 4) Poster session	(session 8) Course 2: MWE annotation (Verginica Mititelu & Voula Giouli) Definitions, SOTA research	(session 12) Course 1: Dependency syntax (Sylvain Kahane)	(session 15) Course 1: Dependency syntax (Sylvain Kahane)	(session 20) Students' presentations of the work done during the training school (all trainers are present)	
lunch	lunch	lunch	lunch	lunch	
(session 5) Course 3: Corpus annotation infrastructure (Daniel Zeman & Agata Savary & Bruno Guillaume) Git Infrastructure - Git for beginners - UD GitHub repositories - PARSEME Gitlab repositories - Github synchronisation in Grew	(session 9) Course 2: MWE annotation (Verginica Mititelu & Voula Giouli) Annotation guidelines	(session 13) Course 3: Corpus annotation infrastructure (Bruno Guillaume) Advanced treebank querying and annotation - querying PARSEME data, - corpus pre-annotation	(session 16) Course 2: MWE annotation (Verginica Militelu & Vocala Giouli) Annotation	(session 21) Brainstorming hackaton (on open issues submitted by the trainees)	
coffee break	coffee break	group photo coffee break	coffee break	(session 22) Closing session	
(session 6) Course 3: Corpus annotation infrastructure (Bruno Guillaume & Sylvain Kahane) Basics of treebank querying and annotation - Corpus queries with Grew-Match - UD vs. SUD - Corpus annotation with Arborator Grew	(session 10) Course 3: Corpus annotation infrastructure (Daniel Zeman & Agata Savary) Corpus format validation: - File formats (CoNLL-U, CUPT) - CONLL-U validator - PARSEME validator - UD/PARSEME consistency	Free time for visits and socializing	(session 17) Course 1; Dependency syntax (Sylvain Kahane)	Free time for visits and socializing	
	Registration, poster hanging (session 1) Opening session (session 2) Personal introductions (session 3) Poster session coffee break (session 4) Poster session lunch (session 5) Course 3: Corpus annotation infrastructure (Daniel Zeman & Agata Savary & Bruno Guillaume) Git Infrastructure - Git for beginners - UD Githuo repositories - PARSEME Gitlab repositories - Github synchronisation in Grew coffee break (session 6) Course 3: Corpus annotation infrastructure (Bruno Guillaume & Sylvain Kahane) Basics of treebank querying and annotation - Corpus queries with Grew-Match - UD vs. SUD	Registration, poster hanging (session 1) Opening session (session 2) Personal introductions (session 7) Course 1: Dependency syntax (Sylvain Kahane) (session 3) Poster session coffee break (session 8) Course 2: MWE annotation (Verginica Mititelu & Voula Gioul) Definitions, SOTA research lunch (session 5) Course 3: Corpus annotation infrastructure (Daniel Zeman & Agata Savary & Bruno Guillaume) Gilt Infrastructure - Git for beginners - UD GitHub repositories - PARSEME Gillab repositories - Github synchronisation in Grew coffee break (session 6) Course 3: Corpus annotation infrastructure (Bruno Guillaume & Sylvain Kahane) Basics of treebank querying and annotation - Corpus queries with Grew-Match - UD vs. SUD	Registration, poster hanging (session 1) Opening session (session 2) Personal introductions (session 7) Course 1: Dependency syntax (Sylvain Kahane) (session 3) Poster session coffee break (session 4) Poster session coffee break (session 5) Course 3: Corpus annotation infrastructure (Daniel Zeman & Agata Savary & Bruno Guillaume) Git Infrastructure - Git for beginners - UD Github repositories - PARSEME Gitlab repositories - Github synchronisation in Grew coffee break (session 6) Course 3: Corpus annotation infrastructure (Bruno Guillaume) Annotation (Verginica Mititelu & Voula Giouli) (session 13) Course 3: Corpus annotation infrastructure (Bruno Girllaume) Advanced treebank querying and annotation infrastructure (Daniel Zeman & Agata Savary) Corpus Gromat validation: - File formats (CoNLL-U, CUPT) - CoNLL-U validator - PARSEME validator - PARSEME validator - PARSEME validator - PARSEME validator	Registration, poster hanging (session 1) Opening session (session 2) Personal introductions (session 7) Course 1: Dependency syntax (Sylvain Kahane) (session 3) Poster session coffee break (session 4) Poster session coffee break (session 5) Course 2: MWE annotation (session 6) Poster session coffee break (session 6) Course 3: Corpus annotation infrastructure (Daniel Zeman & Bruno Guillaume) Git infrastructure (Daniel Zeman & Agata Savary & Bruno Guillaume) Git infrastructure Coffee break (session 9) Course 2: MWE annotation (Verginica Mititelu & Voula Giouli) Annotation guidelines (session 12) Course 1: Dependency syntax (Sylvain Kahane) (session 15) Course 1: Dependency syntax (Sylvain Kahane) (session 15) Course 1: Dependency syntax (Sylvain Kahane) (session 15) Course 2: MWE annotation infrastructure (Bruno Guillaume) Annotation infrastructure (Bruno Guillaume) Coffee break (session 10) Course 2: Corpus annotation infrastructure (Bruno Guillaume) Annotation guidelines coffee break (session 10) Course 2: Corpus annotation infrastructure (Bruno Guillaume) Annotation Corpus pre-annotation Corpus gueries with Grew-Match Coffee break (session 10) Course 2: Corpus annotation Infrastructure (Bruno Guillaume & Sylvain Kahane) Corpus gueries with Grew-Match Coffee break (session 10) Course 2: Corpus annotation Infrastructure (Bruno Guillaume & Sylvain Kahane) Corpus gueries with Grew-Match Coffee break (session 10) Course 2: Corpus annotation Infrastructure (Bruno Guillaume & Sylvain Kahane) Free time for visits and socializing Free time for visits and socializing Free time for visits and socializing	Registration, poster hanging (session 1) Opening session (session 2) Personal introductions (session 7) Course 1: Dependency syntax (Sylvain Kahane) (session 3) Poster session (session 4) Poster session (session 8) Course 2: MWE annotation (session 8) Course 3: Corpus annotation (session 5) Course 3: Corpus annotation (session 5) Course 3: Corpus annotation (session 9) Course 2: MWE annotation (session 9) Course 2: MWE annotation (session 10) Course 3: Corpus annota

Here, you can access the video lessons from the Unidive Training School. The videos are organized by days and sessions. If the link stops working in the future, please write a message to this email: olesea.caftanatov@math.md. Enjoy watching them!

Day 1

- Session 1 and 2
- Session 5 Course 3 Corpus Annotation Infrastructure
- Session 6 Course 3 Basics Of Treebanks

Day 2

- Session 7 Course 1 Dependency Syntax
- Session 8 Course 2 MWE Annotation
- Session 9 Course 2 MWE Annotation
- Session 10 Course 3 Corpus Annotation Infrastructure

Day_3

- Session 11 Course 2 MWE Annotation
- Session 12 Course 1 Dependency Syntax

Day_4

- Session 14 Course 3 Corpus Annotation Infrastructure
- Session 15 Course 1 Dependency Syntax

Day 5

- Session 18 Course 3 Corpus Annotation Infrastructure
- Session 19-21 Students' presentation

PS.Some video lessons may take a little more time to be uploaded.

Location and directions

Location: The tutorials, practical sessions and other school activities will take place at the Computers, Informatics and Microelectronics Faculty, Technical University of Moldova, see faculty building on the map.

Local information

- Please, be aware that Moldova is not in European Union yet.
- Local currency in Moldova is Moldovan leu, it costs roughly 5 euro cents rate. You can change some cash in the airport; in some cases, you have to pay cash, for example in local transport.
- Your European mobile cards will be in roaming in Moldova, be careful to check how much it will
 cost you to call or use mobile internet. Fortunately, you can often catch wifi in the airport, at the
 University, in café, etc.

• Moldova follows Eastern European Summer Time, 3 hours ahead from the UTC universal time.

Directions

- There is only one airport in Moldova: Chisinau airport. Plenty of air companies are flying to Chisinau: Austrian Airlines, Lufthansa, Turkish companies, WizzAir, LOT Polish airlines, Eurowings, HiSky, FlyUp and some others. We have to warn you to be cautious with FlyOne company, it often change or cancel their flights.
- You can use taxi from the airport although the taxi drivers that are waiting there and catching arriving people ask for much higher price than if you call a taxi using an app. If you want to save some money, you can use the trolleybus number 30 that stops right in front of airport building and will take you straight to the city center. The only problem with this trolleybus that it goes every half an hour; so you have to wait.
- In the city buses and trolleybuses you pay directly in the transport, it costs 6 lei, around 30 cents. You can use Google maps or EasyWay app to navigate using local transport.
- Taxi is comparatively cheap; you can use hip taxi to call a taxi for example although there are other taxi apps like Letz or Yandex Go.

Accomodation

There are many hotels in the Chisinau city; you can use booking.com, travel.md or hotels.md to book one. Unfortunately, there are not hotels close to the school venue. The closest one we recommend is Insitutul Muncii Hotel. Other hotels are:

- · Shadow Hotel:
- City Park Hotel;

Also there are many possibilities to rent an apartment close to the school venue, for example:

- Apartment OneClickRenrt Oasis Booking link
- Flatkeepers city view Booking link
- Apartment Deluxe on Moscow Avenue, Booking link
- Retreat Studio Booking link

The cheapest accommodation is in the university dormitories next to the faculty building but most of them has been offered to the refugees from Ukraine and they are still living there. If you intend to book the room in the dormitory write directly to organizers (victoria.bobicev@ia.utm.md) but be aware that the price is really low (5 euro/day) but the conditions are frugal.
