

COST Action CA21167

STSM Hosting Institutions

Name and address of the hosting institution

ÚFAL (Institute of Formal and Applied Linguistics)
Matematicko-fyzikální fakulta / Faculty of Mathematics and Physics
Univerzita Karlova / Charles University

Malostranské náměstí 25
CZ-11800 Praha
Czechia

<https://ufal.mff.cuni.cz/>

Contact information of the host

Dr. Daniel Zeman

zeman@ufal.mff.cuni.cz

<https://ufal.mff.cuni.cz/daniel-zeman>

Duration and dates of the stay

- From two weeks to three months
- Dates to be negotiated, depending on capacity and availability of the host

Possible research topics

Universal Dependencies for underresourced languages. The topic could be either starting a treebank for a language that is not yet covered by [UD](#), or improving and extending a treebank of a language that is in UD but is very small. The researcher should have reasonable knowledge of the language in question (ideally, but not necessarily a native speaker). Some formal linguistic background and/or some programming ability would be an advantage.

CorefUD – adding coreference and entity annotation to UD treebanks. See <https://ufal.mff.cuni.cz/corefud> for the CorefUD project. The work would involve annotation of an underresourced language, hence similar requirements apply as for the UD topic.

Details to be negotiated with the visiting researcher before STSM application is submitted.
