

# OntoLex-FrAC: Standardizing the Corpus-Lexicon Interface

Christian Chiarcos

Anas Fahad Khan

Maxim Ionov

Elena-Simona Apostol

Ciprian-Octavian Truica

Besim Kabashi

Katerina Gkirtzou

**OntoLex:** community standard for publishing lexical data on the web  
machine-readable, FAIR, generic, active community, widely used

**OntoLex-FrAC:** novel module for the corpus-lexicon interface

Come to our poster to see (and discuss)

- How to find a middle ground between tab-separated formats and structured data.
- Why OntoLex and OntoLex-FrAC might be the solution for modelling the corpus-lexicon interface in Unidive (and beyond).  
=> WG2
- Why we need to work on the corpus side of the corpus-lexicon interface.  
=> WG1
- Why we suggest to establish closer ties between UniDive and the W3C Community Groups developing this and related standards.
