 - The announcement serves the realization of the Work and Budget Plan of UniDive

COST Science for Policy Training and Science Diplomacy Training - 27 & 28 June 2023

Dear COST Action Chairs and Vice-Chairs,

On behalf of the COST Association, we are pleased to invite you to the **COST Science for Policy Training**, on Tuesday 27 June 2023 and a **Science Diplomacy Training** on 28 June 2023 the COST Association, in Brussels.

Science for Policy Training – 27 June 2023 (10.00 – 17.00)

Your COST Action started last autumn 2022, and as part of this kick-off process, we offer a dedicated training on how you can reach the full potential in creating lasting connections with policy stakeholders. In a time when we observe an increasingly important role for science informed policy advice, COST is keen to offer you this targeted training session, as COST Actions are the perfect tool for reaching out to different communities and organisations. As such, we encourage COST Actions to engage with different stakeholders, including policy makers, to increase the potential impact of their results.

In specific terms, this training will inform you on how:

- to engage directly with policymakers and understand their perspectives, professional values and knowledge needs;
- to present the best available evidence in a way and at a time that will impact on policy decisions;
- to follow the whole policy cycle and anticipate policy needs;
- to assess the robustness of the evidence from a policy perspective, taking into account both the value, quality and pertinence of the evidence and its limitations.

Science Diplomacy Training - 28 June 2023 (09.30 – 13.15)

The Science Diplomacy training is designed to provide you with an in-depth understanding of the principles and practices of science diplomacy, and its relevance to addressing global (scientific) challenges. It will equip you with the necessary skills to engage in effective communication and collaboration with diverse stakeholders, including policymakers, diplomats, and the public, in order to promote science-based solutions to pressing global issues. A team of experts in science diplomacy will lead the training, which will consist of a series of interactive sessions, discussions, and case studies. You will have the opportunity to learn from their vast experience and engage in meaningful dialogue with your fellow COST Action participants from different countries and disciplines.
