Universality, Diversity,
and Idiosyncrasy in
Language Technology

EU Cost Action CA21167

University of Naples "L'Orientale"

Department of Asian, African and Mediterranean Studies

1969: Swahili Language and Literature established by Elena Bertoncini Zúbková

Vocabolario swahili italiano e italiano-swahili (1977)

1000s of usage examples for Kamusi Project (1995)

2004: Maddalena Toscano

Dizionario swahili. Swahili-italiano, italiano-swahili

small Swahili untagged raw corpus

2018: Rosanna Tramutoli - Swahili-Italian linguistic glossary

African Languages Overview

2000-ish languages in 55 countries

Mother tongues are African

Early primary school is often in a local language

Secondary school is in a colonial language

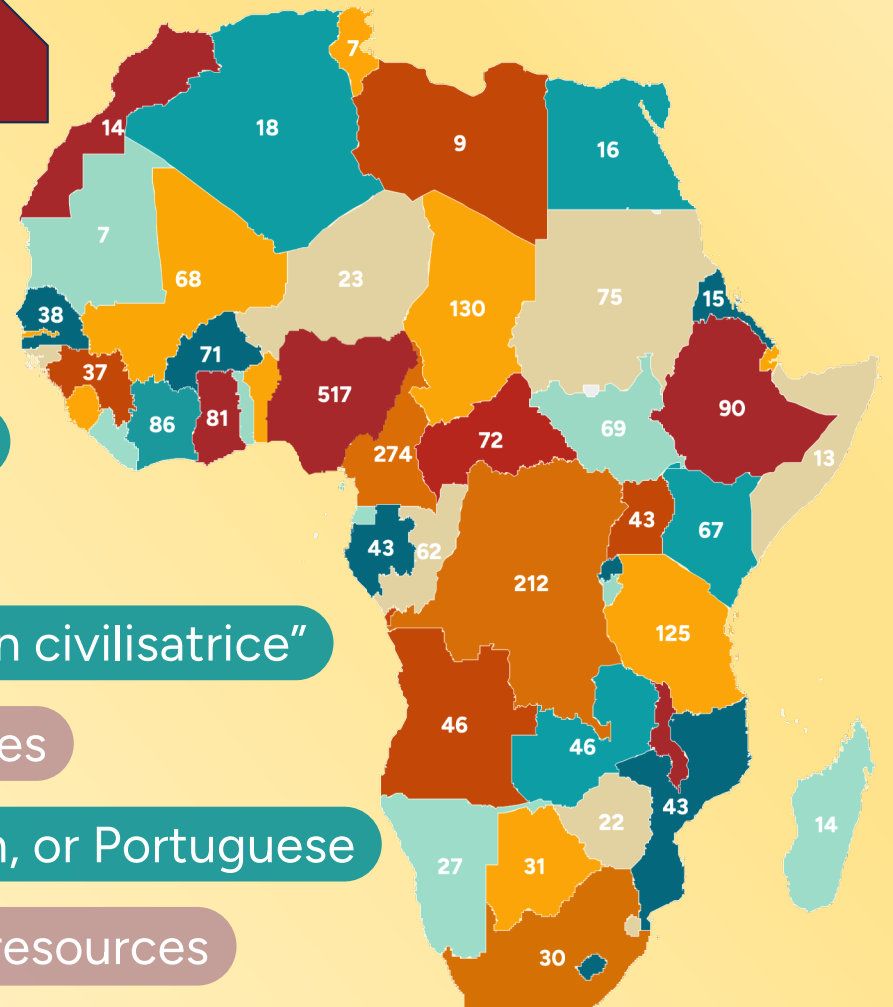

European languages were central to the "mission civilisatrice"

Governance usually occurs in European languages

About 5% of Africans have good English, French, or Portuguese

Dozens of "official" African languages, but few resources

Rampant multilingualism (mother tongue + father tongue + national + colonial legacy)

Official African Languages

Always: European Colonial Legacy Language

Tanzania: Swahili since independence in 1961

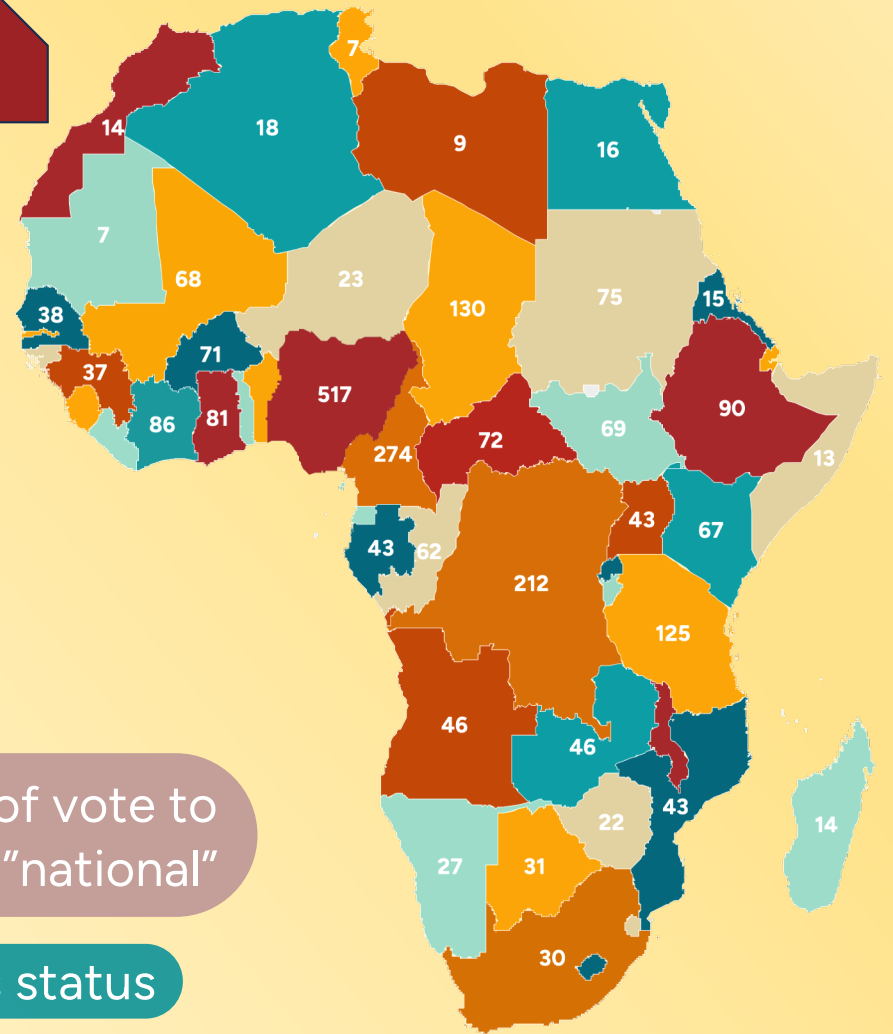

Kenya: Swahili official since 2010

Zimbabwe: 16 official languages since 2016

South Africa: 9 African + Afrikaans + English

Mali: 2023 constitutional amendment with 97% of vote to make French "working" and 13 languages "national"

Other countries: African languages have various status

African Languages in Education

African languages frequent for Early Primary

Secondary is in colonial legacy language

Poor performance on international exams in French or English

STEM teachers often have weak language training

Compare to  &  & Asia:

STEM is taught in local language

English and French are taught as course subjects

Research: students learn better in their own language

Ideology: success occurs in international language
(many policy-makers, grant-makers, and parents)

World Languages

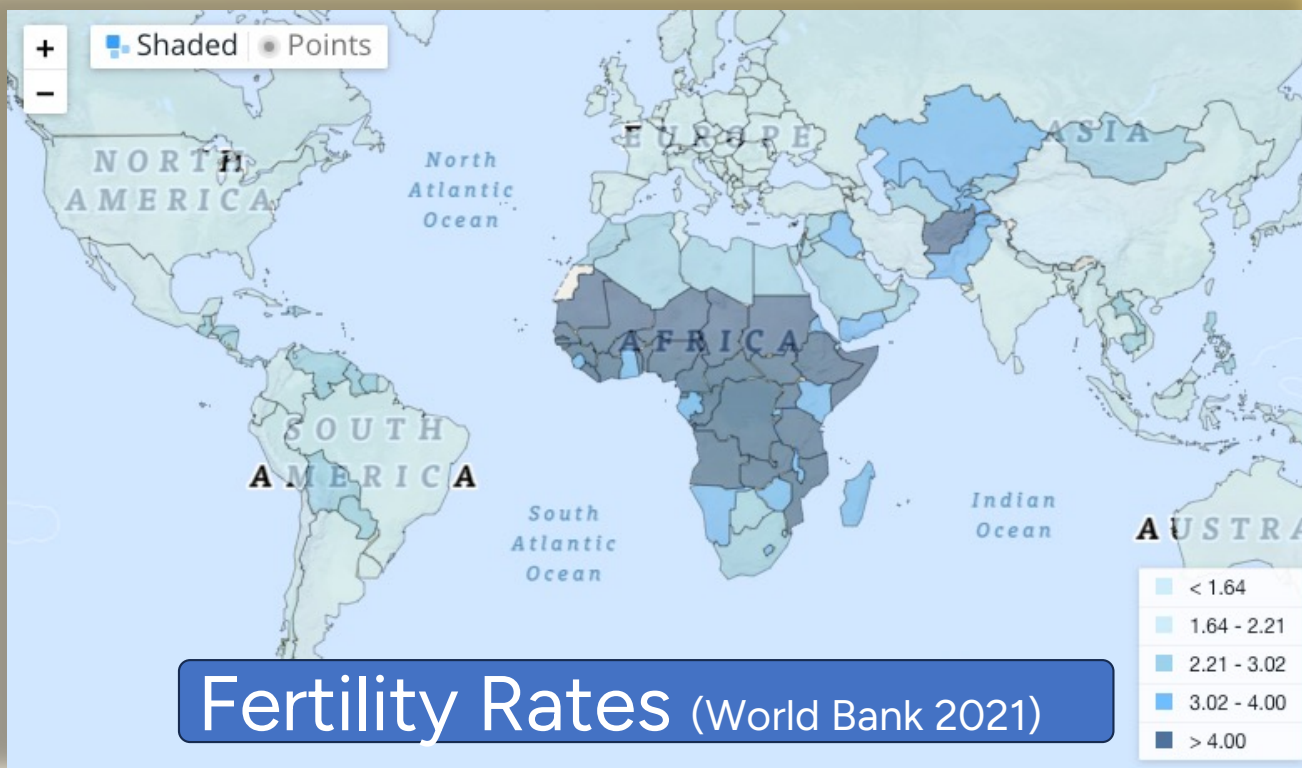

% of Global Inventory

% of Technology

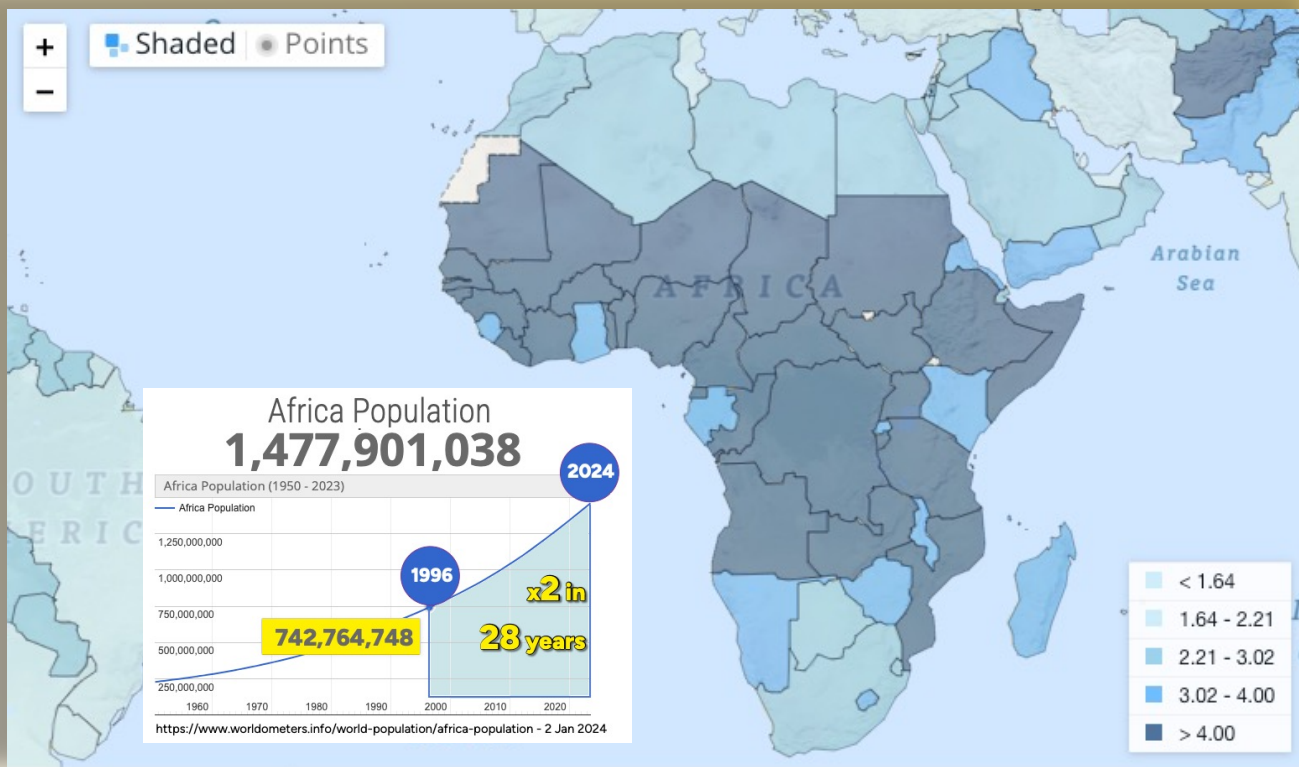

"Internet" is a rough proxy for all language tech

many African Languages are GROWING fast

many African Languages are GROWING fast

100+ big languages are getting bigger

1000+ smaller languages are under threat

Mega languages and **Endangered** languages have **different** needs and challenges

Caution: Language # Estimates are Guaranteed to be Inaccurate

Language is not usually a census question

Estimates for different languages might be from decades apart

Multilingualism: a speaker counted for X might also speak Y and Z

The boundaries between languages/ dialects/ macro-languages are very blurry

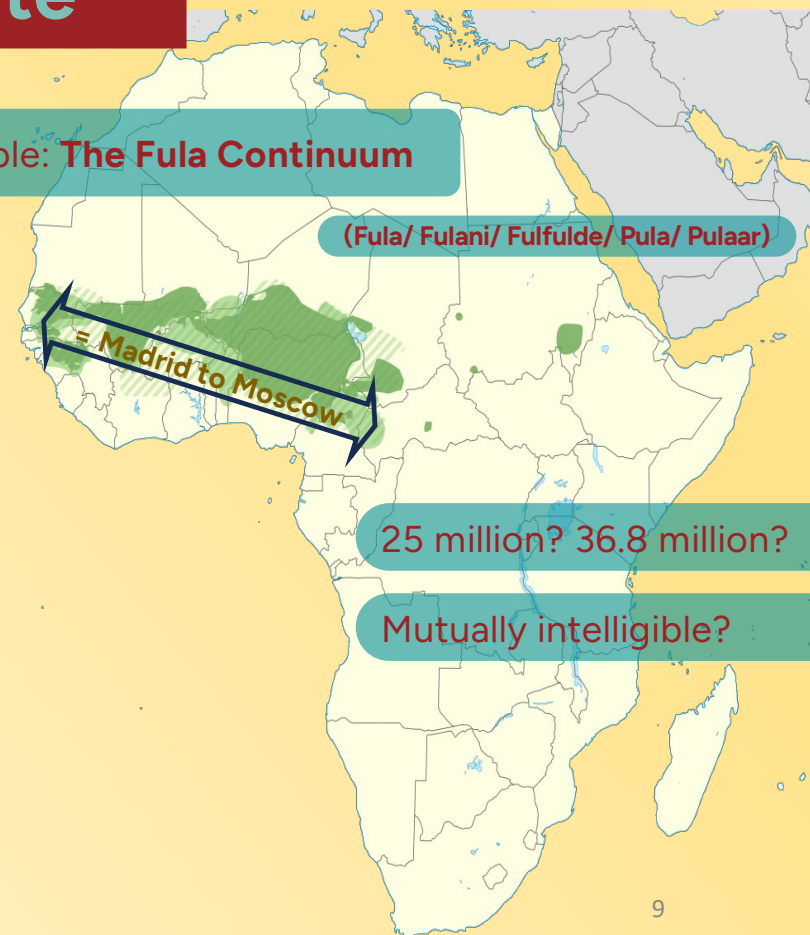

Example: **The Fula Continuum**

(Fula/ Fulani/ Fulfulde/ Pula/ Pulaar)

= Madrid to Moscow

25 million? 36.8 million?

Mutually intelligible?

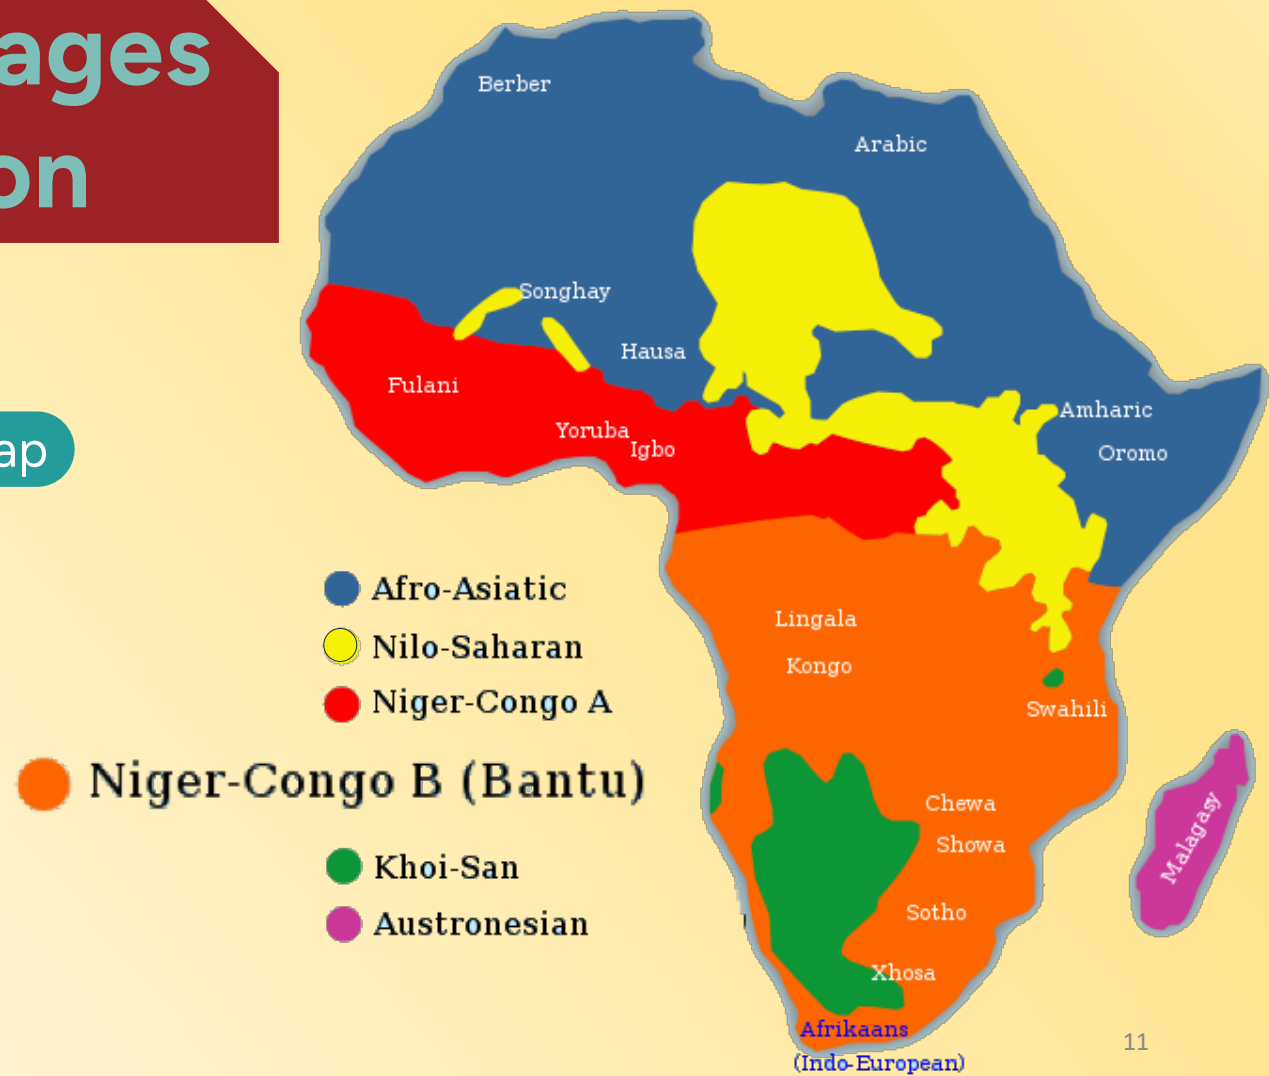

100 Languages with 1,000,000+ mother tongue speakers in Africa

African Languages Classification

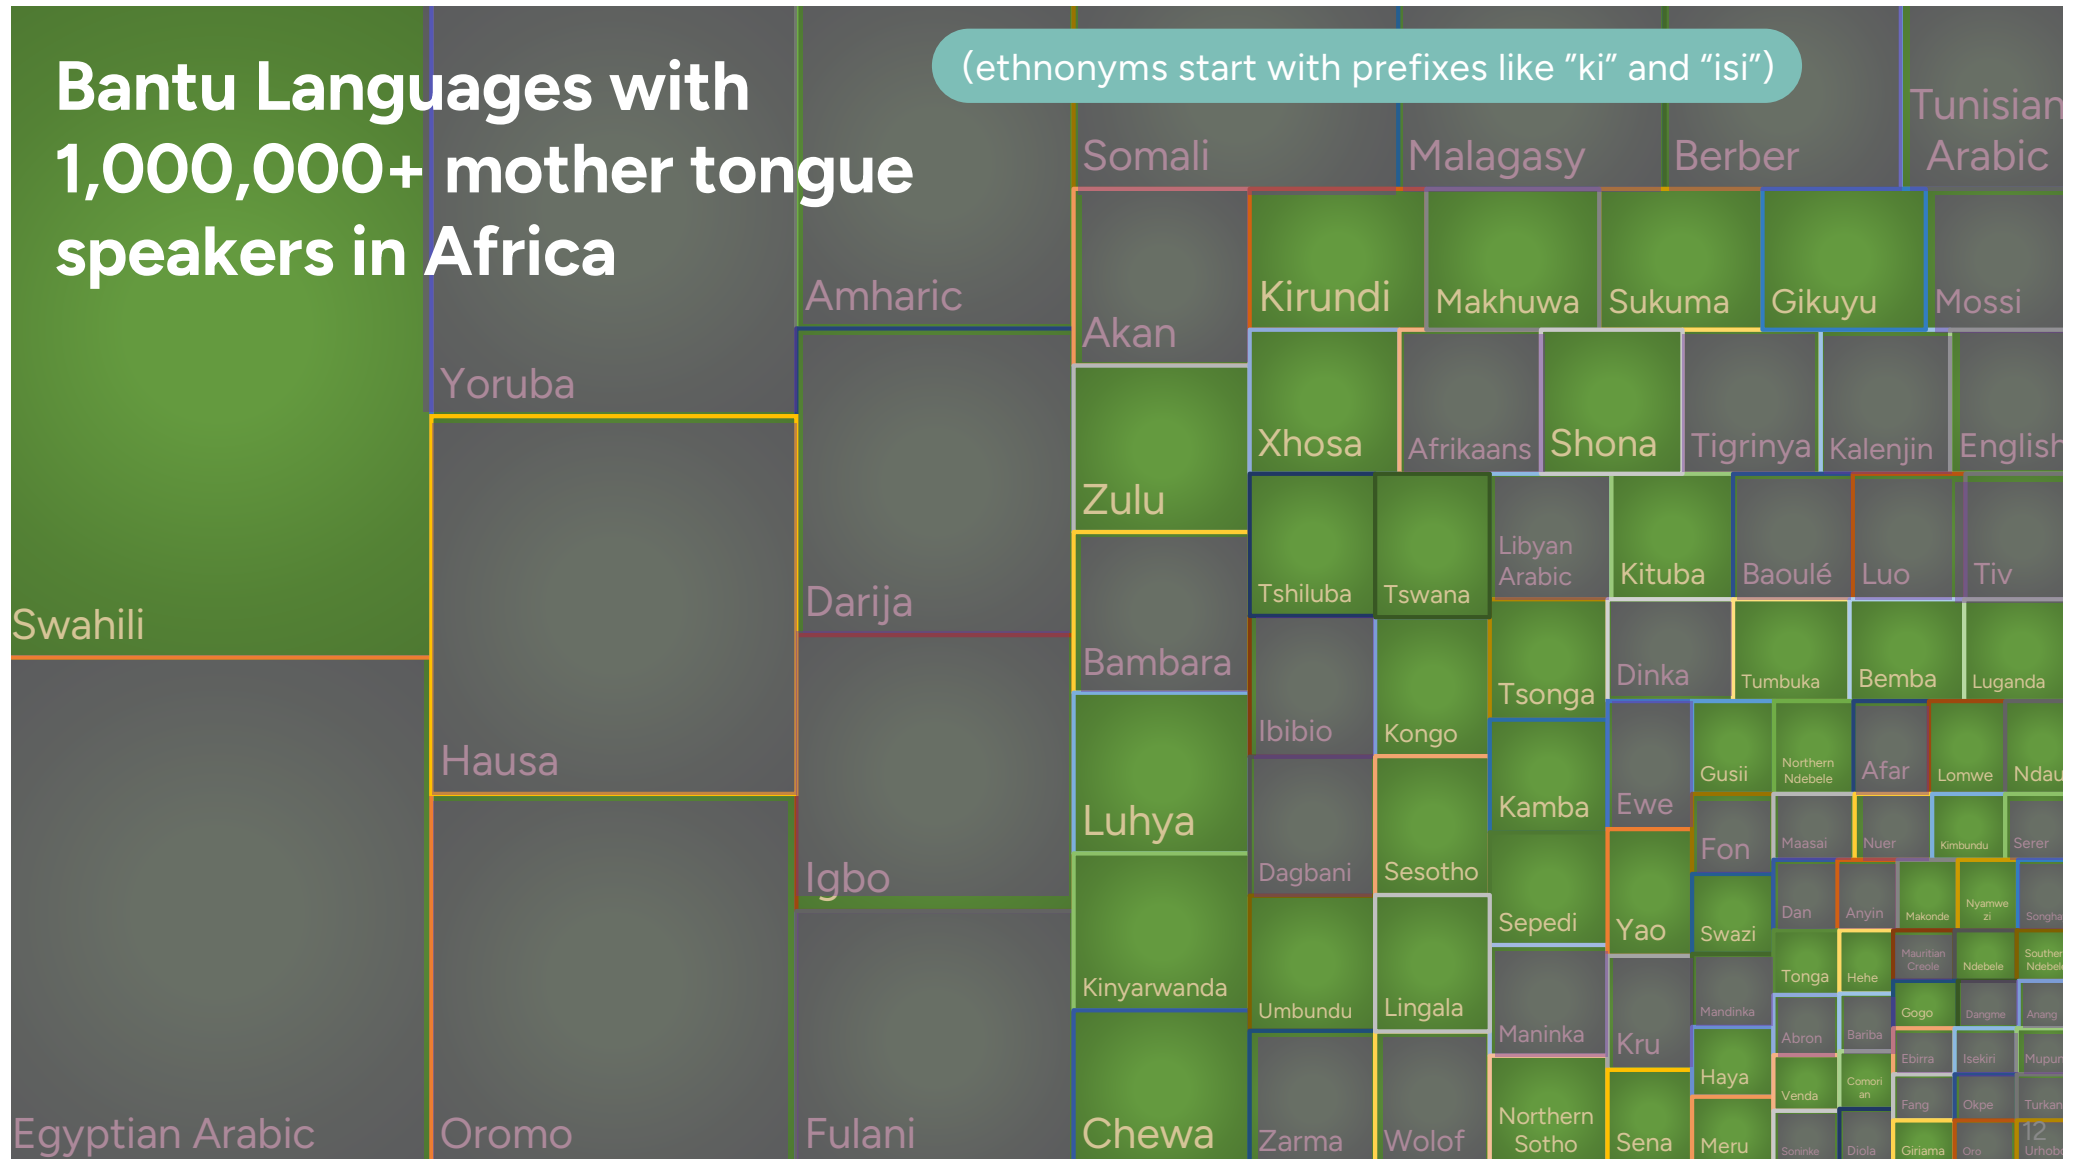

this map gives a general idea

on the ground, territories overlap

Bantu Languages with 1,000,000+ mother tongue speakers in Africa

(ethnonyms start with prefixes like "ki" and "isi")

Bantu Languages

-ntu (ba**NTU**) is root for "person"

Proto-Bantu dates back X-thousand years

440 – 680 languages

~7% of world inventory

300-500 million speakers

27 present-day countries

Bantu Languages

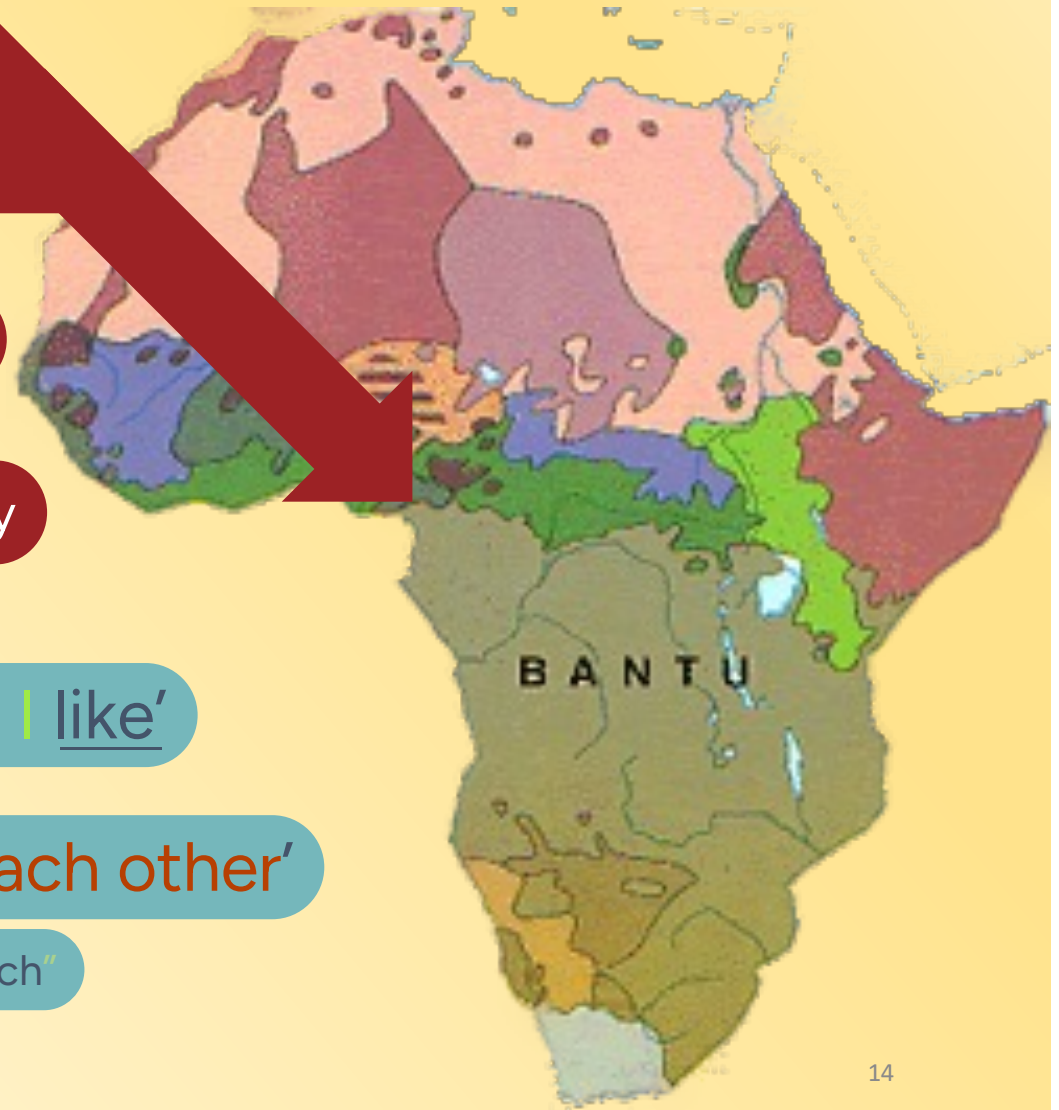

noun class system (linguistic “gender”)

verbs: complex agglutinative morphology

ninachokipenda ‘the (book) that I like’

wamesomeshana ‘they taught each other’

root –SOMA = “read”, causative –SOMESHA = “teach”

Properties of Swahili: Inflection

reflexes manifested:

Lexically, on the Noun

Syntactically, via Agreement

class | subject | 'this' | 'nice' | 1 or 3 | who fell down

cl. 1: **mtu** 🧑 **huyu** **mzuri** **mmoja** **aliyeanguka**

cl. 2: **watu** 🧑🧑 **hawa** **wazuri** **watatu** **walioanguka**

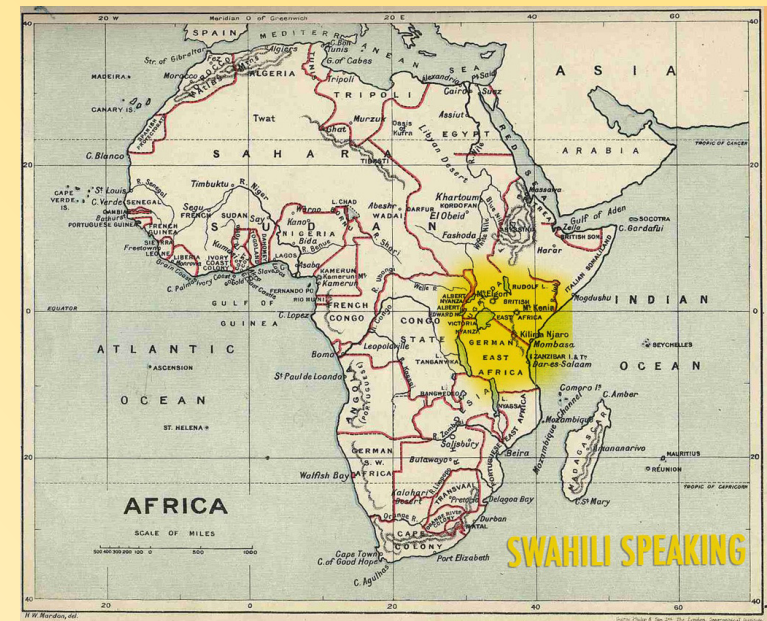

cl. 3: **mfuko** 🧡 **huu** **mzuri** **mmoja** **ulioanguka**

cl. 4: **mifuko** 🧡🧡🧡 **hii** **mizuri** **mitatu** **iliyoanguka**

cl. 6: **mayai** 🥚🥚🥚 **haya** **mazuri** **matatu** **yaliyoanguka**

noun class system

complex agglutinative morphology

Swahili Citations: Dictionary or Data?

complex considerations for computation

Nouns: SINGULAR + fields for plural and class

mtu (noun) pl: watu class: 1/2 eng def: person

Verbs: with hyphen for people, without for machines

Millions of variations, e.g.: aki**anguka**, wata**anguka**,
umeo**anguka**, yaliyo**anguka**, kitakacho**anguka**, zinge**anguka**

-**anguka** (verb) eng def: 1. fall down, 2. fail

Numerals, possessives, adjectives: with hyphen + field for class forms

-**zuri** (adj) eng def: good
class: 1. mzuri, 2. wazuri, 3. mzuri, 4. mizuri, 5. nzuri, 6.
mazuri, 7. kizuri, 8. vizuri, 9. nzuri, 10. nzuri, 11. mzuri

.mtu nm wa- [a-/wa-] person, human
being, individual. (ms) wa miraba
minne giant; (hasa kijana wa kike)
brunette; mbaya/mnyonge caiff;
asiye na adabu/mtu wa hasira churl;
mwenye hasira cross-patch;
anayejikomba flunkey/flunky; kitu
chenye mkosi jinx; asiyetaka kufanya
kazi lay about; maskini mwenye
ugonjwa lazar.

anguka.a kt [sie] 1 come down, fall
down, drop, crash. 2 lose in a
business. 3 fail: Ame~ mitihani yake
he failed his examinations. (tde)
angukia, (tden) **angukiana**, (tdew)
angukiwa; (tdk) **angukika**. **anguko**
nm.

.zuri¹ kv beautiful, pretty, gorgeous;
good: Mtu m~ good person.

Swahili Derivation

most word-formation is done by suffixation

soma (verb) eng def: read

somea: study

someka: be decipherable

somesha: teach, pay tuition for (someone)

.soma *kt* [ele] 1 read to/for. 2 study, take a subject: *Ana- nini?* what subject is he studying? *Ana-udaktari* he is studying doctor of medicine. (*tdk*) **someka**; (*tds*) **somesha**.

.soma *kt* [ele] 1 read. 2 study, receive teaching; attend school; be educated. 3 observe sb. (*tdt*) **soma**; (*tdk*) **someka**; (*tdn*) **somana**; (*tds*) **somesha**; (*tdv*) **somewa**.

some word-formation is done by prefixation

masomo: studies

msomeshaji: instructor

wasomi: scholars

someka *kt* [sie] be readable, be decipherable. *Hati yake haizo-meki* his handwriting is unintelligible. (*tdt*) **someka**; (*tds*) **somesha**.

.msomeshaji *nm* wa- [a-/wa-] teacher, a person who helps other people how to read.
.msomi *nm* wa- [a-/wa-] scholar, learned person, educated person.

examples of derivational families (some frequent forms)

anga, **angama**, **angika**, **angua**, **anguka**,
angukia, **angukiana**, **anguko**, **angusha**,
jiangusha, **angulia**, **kiangushio**,
mwangushi, **mwanguko**

tuma, **tumia**, **tumika**, **tumikia**, **tumikisha**,
tumikiana, **tumisha**, **tumilia**, **tumana**, **mtume**,
mtumishi, **mtumwa**, **mtumwaji**, **tume**, **utume**,
utumi, **utumishi**, **utumwa**, **matumizi**, **matumishi**

.somesha *kt* [ele] 1 teach: *Ana-watoto wadogo kasoma* he teaches small children to read. 2 send to school, educate: *Ana- watoto wake ng'ambo* he is educating his children overseas. (*tdt*) **somesha**; (*tdk*) **somesheka**; (*tdv*) **someshwa**.

Swahili Language

aka **Kiswahili** (the ethnonym)

mother tongue of millions

daily language of tens of millions

trade language of 100 – 200,000,000

official language of African Union, EAC, & SADC

grammars, dictionaries, teaching materials, research

poetry (400 years), literature, newspapers, TV, radio, film, web

 taught at many universities in Europe & North America

July 7th is UNESCO World Kiswahili Language Day

Resources for Swahili

Dictionaries (“kamusi” in Swahili)

Kamusi GOLD (Global Online Living Dictionary) – 60,000+ entries (currently offline)

Africanlanguages.com – 15,000 entries

FreeDict – 1,500 entries

Africanlanguages.com – 15,000 entries

Swahili-Polish dictionary – 7,000 entries

TUKI (University of Dar es Salaam)– semi-available online

Resources for Swahili

Corpora

ACALAN Kiswahili Corpus - NEW a small collection of literary texts; unknown size, unknown sources

Helsinki Corpus of Swahili - about 25 million words available in the Language Bank of Finland

- The Not Annotated Version is available for download
- The Annotated Version is available in the concordance service
- The corpus is divided into subcorpora
 - Old material (~1952-2003)
 - New material (2004–2015)

Global Voices – used as UD development corpus

Various new datasets for AI and Speech Recognition

Resources for Swahili

Tools

AINI - morphological analyser (1989), produced the lemma list of a text with the indication of the main morphological categories; not available anymore

SALAMA Swahili Language Manager made of SWATWOL a two-level morphological analyser and SWACGP a morphological disambiguator and syntactic mapper; not freely available

Segmenter for Swahili verbs - based on the FreeDict Swahili-English dictionary

Swahili Wikipedia – 80,000 articles, but very problematic

- PanSALB – Pan South African Language Board (11 languages)
- South African national lexicography units
- Webonary.org (SIL) – bilingual stand-alone dictionaries for 100+ small languages – e.g. 8500 Lugwere-English words
- AfLAT.org – online resource center, last updated 2019
- ANLoc – African Network for Localisation – defunct
- Dozens more resources listed by Columbia University Libraries (many listings are defunct)
 - > <http://kamu.si/columbia-african-language-resources>

No systematic data for NLP

Factors in African Language Exclusion

- No sense of belonging to a constituency as an excluded category
- No basis to consider technology as linguistically malleable
- ACALAN (Academy of African Languages) is non-technical and spread thin
- African proponents of African languages tend to be linguists, not involved in computation
- Computational linguists tend to not be African or aware of African languages as a viable or important subject
- African computer science students who may want to work on African languages have
 - > no support
 - > few datasets
 - > no mentors
 - > no great examples
 - > no evident market or career path
- European universities receive European support for European languages
- No European organization for advocacy or research, despite many immigrants
- Little African-American connection to African languages

Matatu Lugha 9

Makala Majadiliano Soma Hariri Hariri chanzo Fungua historia

Matatu ni **nen**o la kawaida nchini **Kenya** na **Uganda** la kutaja **gari** aina ya **daladala** linalotumika kama **usafiri** wa **umma**.

Jina "matatu" labda lilitokana na **nauli** ya **sarafu tatu** iliyokuwa kawaida kwa **safari moja** matatu yalipoanza.

Matatu huhudumia **njia** maalumu yenye **namba** yake.

Dereva anafanya **kazi** yake pamoja na msaidizi anayeitwa "manamba" mwenye kazi ya kukusanya **pesa** na kufungua au kufunga **mlango**.

Mara nyingi ni magari ya **Kijapan** yenye ruhusa ya kubeba **abiria** 14. Hadi **mwaka 2003** matatu hayakufuata **utaratibu** huu wala taratibu nyingine. Ilikuwa kawaida kuingiza zaidi ya watu 20 katika gari moja lenye **viti** 15. **Maafisa** wa **polisi** ya **barabarani (trafiki)** walizoea kupokea **rushwa** za matatu kila **siku**, hivyo walishindwa kuwaambia neno.

Serikali mpya ya **Rais Mwai Kibaki** iliweza kubadilisha hali hiyo tangu mwaka 2003, hasa **waziri** wa **usafiri John Michuki** aliyelazimisha wenye matatu kukubali utaratibu ambao haukuwa mpya lakini ulipuuzwa miaka mingi hadi kusahauliwa isipokuwa **wazee** walikumbuka siku za kale.

Tangu mwanzo wa mwaka **2004** matatu yanatakiwa kuonyesha nje kanda ya **rangi** ya **njano**; dereva na manamba wawe na **sara**, kila kiti kinapaswa kuwa na kanda na matatu kama mahasi yanatakiwa kuwa na "**spidigavana**" yaani

Matatu mjini Nairobi mwaka 2002 (bado bila kanda ya njano) ikibeba watu wengi

“Theory of Change”

Demanded by European foundation that exists because of African cacao money

European theory of language within the “Mission Civilisatrice” / “the White Man’s burden” has been in place since 1884

tested on generations of African students

failed but ongoing

Our theory:

Students learn better in languages they understand

People benefit from technology only if it speaks their language

It is easier to teach 100 African languages to computers than to expect a billion people to learn European colonial languages

Europe vis-à-vis Digital Language Technologies

Own Languages! Support for Africa?

"Digital Inclusion" ≠ Languages

Generated by Microsoft Bing CoPilot: "A conversation where Europe is talking and Africa is listening". 28 January 2024

Europe vis-à-vis Digital Language Technologies

Our Africa Priorities

African Language Tech

Agriculture and food security

Health

Fragility, conflict, and human rights

Migration

Good governance

Gender equality

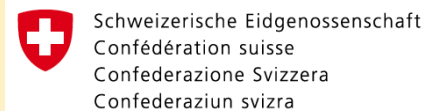

Disaster preparation and emergencies

Climate change and environment

Water

Basic education and vocational skills

Private sector development and finance

Solutions are outside scope of expertise

Money is finite

Google/ Microsoft/ AI has this covered

Maybe a few K for some endangered language?

African languages are too primitive for science and tech – only useful at home

Calling out colonialism here is impolite

It's been our pleasure to work with you over the years.

We hope to continue this partnership for many more years to come.

I'm doing great too. I heard that we have a long history of trade and cultural exchange. That's amazing!

We feel the same way. Thank you, Europe.

Yes it is. We're grateful for the support that Europe has provided us over the years.

You're welcome, Africa. Let's keep up the good work together!

PLATFORM FOR AFRICAN LANGUAGE EMPOWERMENT LINGUISTIC DATA COMPONENT

- Who PALE is
- Why PALE is needed
- What PALE is
- African Linguistic Data at PALE's core

Who PALE is

- ACALAN: African Academy of Languages (African Union intergovernmental language organ)
- 20 Vehicular Cross-Border Language commissions
- Academic institutions (eg University of Nairobi)
- Industry partners
- Civil Society organizations including Kamusi Project International (NGO for linguistic data and technology)

Why PALE is needed

- Africa has 1,400,000,000 people speaking over 2,000 languages
- Technology resources are scarce and scattered, for big languages and endangered languages alike
- Exclusion from language technology means exclusion from global systems of knowledge and prosperity
- An African Languages platform will pull together partners, technologies, and linguistic knowledge to promote economic and social development across the continent

What PALE is

The platform stands on 4 legs:

1. **ACALAN information**, including language policies from 55 AU member nations, activities of VCBL commissions
2. **Repository** of information from external organizations. This will resemble the European Language Grid
3. **Hub** for building and sharing African linguistic data and software by PALE partners, ultimately for all 2000 languages
4. **Communications center** for research and development on African languages

The hub (the third leg) has components including:

- Linguistic Atlas of Africa – info about each of 2000 languages
- Corpora – systematically digitized texts
- Archives – other scanned texts (PDFs)
- Language technology software (speech recognition, spell-check, etc)
- Localized software for non-linguistic purposes
- Dictionaries and other linguistic data

African stool by unnamed artist:
kamu.si/acalan-stool

African Linguistic Data at PALE's core

Kamusi gathers and disseminates linguistic data across languages. Kamusi systems will be central to PALE's data activities

- Fine-grained data with rich information, including inflected forms (kamu.si/kam4d)
- Semantic translation links among all languages
- Tools for language experts to contribute data
- Tools and games for crowdsourcing validatable linguistic information
- Mobile and web applications for users to access data around the continent
- Future-facing data system for technologies such as machine translation and speech processing (kamu.si/big-picture-playbook)

Illustrations generated by Microsoft's Bing CoPilot

Text is quoted from real correspondence with the Swiss Development Cooperation agency (SDC)

We support the idea of this initiative and fully understand that linguistic equity is a priority for AU member states

Our financial support to AU initiatives has so far been limited to project-based engagement within the framework of country or regional programs in Africa

This is based on the policies and objectives of the respective programs

Most other European agencies offer no response

What's hard about African Language Technology?

Getting Data (from people 🧠, not corpora or the ether 🤖): systems built @ Kamusi

Diagramming the language (e.g. UDS):

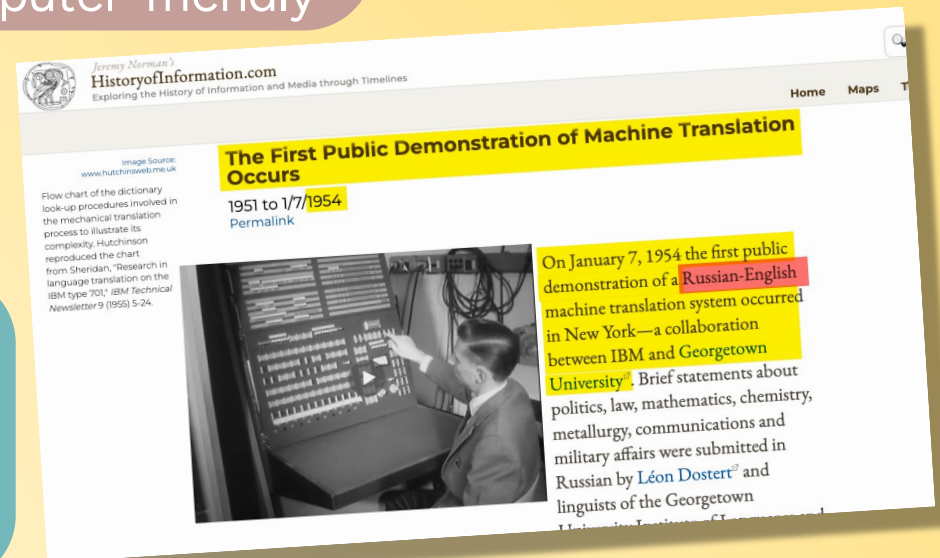

Bantu languages are extremely regular, computer-friendly

Convincing the world it CAN be done

Convincing the world it SHOULD be done

MONEY:

- European governments won't pay
- Philanthropies and foundations won't pay
- Africans can't pay

Concluding Thoughts

African languages overall are not dying, they are growing

English and French are not taking over

African languages are not too difficult for NLP, technically

The difficult barriers are socio-political

Ordinary people do not know language equity is possible

Policy and grantmakers live in an elite language bubble

"Diversity" is not a widely-shared concern outside a few chambers like UniDive

Until we address the indifference and inertia, nothing will change

Asanteni!
